

OTHER USES FOR BASIC-H²

Since Basic-H² is a general purpose household cleaner, you can use it for many other purposes, a few of which are listed below.

We recommend keeping a 4 oz. Squeeze bottle of Basic-H² concentrate at your kitchen counter or sink, in the bathroom, in the laundry room, and in the garage for convenient use.

Cleaning Hands: Place a few drops on one palm and rub thoroughly over both hands. Add a little water, continue cleaning; rinse. Removes grease, dirt, and odors. (It is pH balanced and will not dry skin).

"For many years I washed all my fruits and vegetables with Basic H. I used ¼ teaspoon of Basic H to one gallon of water. The reason I did this was to remove the chemical sprays used on our foods. I had no idea that Basic H would kill so many strains of bacteria" Susan, long-time customer

Are you using Basic-H² to wash your fruits and vegetables???

**PESTICIDES ARE
POISON**

SHAKLEE A Friend of the Earth

The Shaklee Corporation has been setting the ecological example by teaching ecology and nutrition for decades.

The very first Shaklee product was made in 1915, and the philosophy of the company has always been to produce "**Products in Harmony with Nature and Good Health.**"

Shaklee's full line of gentle, effective cleaners do not contain any toxic fumes, corrosive chemicals, phosphates, nitrates or borates.

Dr. Shaklee's deep respect for Nature led to a lifelong commitment to the environment, and this legacy is still carried on by millions of independent Shaklee Distributors and product users world-wide.

Toxin-Free Fruit and Vegetable Wash

Shaklee Basic-H²™

Removes:

Waxes

Poisonous Spray Residue
Dirt & Grime from Handling
Kills E. Coli Staph Epidermidis,
and Staph Aureus

Warning: E. Coli can show up on fruits and vegetables.

Eating them can make you and your family deathly ill!

On 20/20 Monday (May 11, 1998) Lynn Sherr found some surprising and frightening sources of E. Coli infection – fruits and vegetables! A deadly strain of E. Coli bacteria was found on lettuce! Cantaloupe can carry Salmonella on the outside rind. In 2008, Spinach was found to be contaminated with E. Coli.

Consumers are being warned to wash all fruits and vegetables.

Basic H

has been shown to Kill

E. Coli, Staph Epidermidis, and Staph Aureus

A microbiology professor in New Jersey tested the anti-bacterial effects of Basic H. He placed bacteria in water in a Petri dish and used 1 drop of Basic H. The results:

Basic H Killed –

STAPH EPIDERMIDIS - skin bacteria that causes pimples and acne

STAPH AUREUS - bacteria that causes colds and respiratory infections

E. COLI - bacteria found in meat, poultry, eggs, fruits, and vegetables

What is Basic H²?

“H” stands for “Household.”
Shaklee Basic-H² is a Household Cleaner

Basic-H² is:

- ✓ Pollution free
- ✓ Concentrated
- ✓ Non-flammable
- ✓ Safe
- ✓ Versatile
- ✓ Biodegradable
- ✓ Effective
- ✓ Gentle
- ✓ Guaranteed
- ✓ Economical
- ✓ Environmentally friendly
- ✓ Kosher certified
- ✓ PH Balanced

Basic H² is an organic wetting agent and surfactant. Basic-H² surfactants break down the surface tension of water, making it 300 times wetter!

Its fast wetting action penetrates dirt, oil-based sprays, and wax on foods, so they can be washed away.

Available in 16 oz or 64 oz

How to Use Basic H²

- To wash baking potatoes, carrots, celery, lettuce, apples, grapes, etc...use 1/8 - 1/4 teaspoon of Basic H in a basin of water. Soak, wash, and rinse.
- To wash an individual piece of fruit or vegetable: add 1/2 teaspoon of Basic-H to a 16 oz spray unit and fill with water. Spray fruit or vegetable, wash and rinse
- To crisp lettuce, use 1 or 2 drops of Basic- H in a bowl of water.
- After dicing onions, garlic, etc., does the scent linger on your hands? Simply rub a few drops of Basic-H into your hands, then rinse.
